No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 34, 1

Patent No. 6309857

GENERAL INFORMATION:

APPLICANT: Pauli, Benedicht U.

TITLE OF INVENTION: Nuclectide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REFERENCE: 18617.0052

CURRENT APPLICATION NUMBER: US/09/193,562D

CURRENT FILING DATE: 1998-11-17

PRIOR APPLICATION NUMBER: US/60/065,922

PRIOR FILING DATE: 1997-11-17

NUMBER OF SEQ ID NOS: 47

Sequence 5, Application US/09623624

Patent No. 657634

GENERAL INFORMATION:

APPLICANT: Magainin Pharmaceuticals, Inc.

TITLE OF INVENTION: Atopha-Associated Factors as Targets for Treating

TITLE OF INVENTION: Atopha-Associated Factors as Targets for Treating

TITLE OF INVENTION: Atopha-Alergies, Including Asthma and Related

TITLE OF INVENTION: Disorders

TITLE OF INVENTION: Disorders

TITLE OF INVENTION: Disorders

CURRENT APPLICATION NUMBER: US/09/623,624

CURRENT FILING DATE: 2000-09-06

PRIOR APPLICATION NUMBER: PCT/US99/04703
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                .

Patent No. 6309857

GRERAL INFORMATION:

APPLICANT: Pauli, Benedicht U.

TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REFERENCE: 18617.0052

CURRENT APPLICATION NUMBER: US/09/193,562D

CURRENT APPLICATION NUMBER: US/60/065,922

PRIOR PILING DATE: 1997-11-17

NUMBER OF SEQ ID NOS: 47

LENGTH: 914
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          25 ATGGGGCCATTTAAGAGTTCTGTTTCATCTTGATTCTTCACCTTCTAGAAGGGGCCCTG
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 28,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 46. Application US/09193562D

Patent No. 6309857

GENERAL INFORMATION:

AEPLICANT: Rauli, Benedicht U.

TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REFERENCE: 18617.0052

CURRENT PAPLICATION NUMBER: US/09/193,562D

CURRENT FILING DATE: 1998-11-17

PRIOR APPLICATION NUMBER: US/60/065,922

PRIOR FILING DATE: 1997-11-17

NUMBER OF SEQ ID NOS: 47

LENGTH: 903
                                                                                                                                                                                                                                                          Sequence 34, Application US/09193562D
Patent No. 6309857

US-09-193-562D-30

Sequence 30, Application US/09193562D

Sequence 30, Application US/09193562D

Patent No. 6309857

GENERAL INFORMATION:

TILLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REFERENCE: 18617.0052

CURRENT PAPLICATION NUMBER: US/09/193.562D

CURRENT FILING DATE: 1998-11-17

PRIOR APPLICATION NUMBER: US/60/065,922

PRIOR FILING DATE: 1997-11-17

SEQ ID NO 30

LENGTH: 1000
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ||| :::||| :::||| 3 PheSerLeuLysVallleLeuPheLeuSerLeuLeuLeuSerProValLysSerSer

                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 12, Application US/09193562D

Patent No. 6309857

GENERAL INFORMATION:
APPLICANT: Pauli, Benedicht U.
TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium
TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
FILE REFERENCE: 18617.0052
CURRENT PAPLICATION NUMBER: US/09/193,562D
CURRENT APPLICATION NUMBER: US/09/193,562D
PRIOR FILING DATE: 1998-11-17
PRIOR FILING DATE: 1997-11-17
NUMBER OF SEQ ID NOS: 47
LENGTH: 821

TITLE OF INVENTION: COMPOUNDS FOR IMMUNOTHERAPY AND DIAGNOSIS
TITLE OF INVENTION: OCOMPOUNDS FOR IMMUNOTHERAPY AND STRING BAPPLICANT: 20101-08-03
CURRENT FILING DATE: 2001-08-03
NUMBER OF SEQ ID NOS: 1124
SOFTWARE: FastSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ij
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Length 3311;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       3; Indels

Database :

Minimum DB seq length: 0 Maximum DB seq length: 200000000 Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
